

Double-Take[®] for AIX

Quick Start Service

Build and Tune Your High Availability/Disaster Recovery Environment

A Double-Take[®] for AIX Quick Start service provides implementation expertise, backed by years of experience, for Double-Take[®] RecoverNow[™] for AIX or Double-Take[®] Availability[™] for AIX, to help you build and tune your disaster recovery/high availability environment quickly, professionally and accurately.

A Double-Take for AIX Quick Start service is the best way to accelerate your deployment with confidence, streamlining your project and ensuring that everything is properly configured for optimal performance and protection.

A Quick Start service includes three important phases. Vision Solutions' experts:

- 1 Conduct a project-planning workshop** with you and your team to clearly identify your requirements and objectives.
- 2 Prepare and deliver** a detailed Solution Planning Report.
- 3 Work with you** to install, configure and tune the solution, as defined in the Solution Planning Report, on one source and one target node. During this phase, you and your team will be trained on how to start, stop, administer and perform basic troubleshooting for Double-Take RecoverNow for AIX or Double-Take Availability for AIX. Time will also be allotted for Q&A to further facilitate skills transfer and ensure your ongoing success.

Benefits

- Shorten your implementation project cycle
- Ensure optimal configuration and customized protection
- Gain immediate hands-on confidence in managing Double-Take for AIX

Deliverables

- Solution Planning Report
- Expert installation and configuration of Double-Take RecoverNow for AIX or Double-Take Availability for AIX on a pair of nodes (one source and one target)
- Skills transfer
